

```
def fibonacci(n):  
    if n == 0:  
        return 0  
    elif n == 1:  
        return 1  
  
    a = 0  
    b = 1  
  
    for i in range(2, n + 1):  
        a, b = b, a + b  
  
    return b  
  
n = int(input("Enter the value of n: "))  
print("The", n, "th Fibonacci number is:", fibonacci(n))
```

```
/usr/local/bin/python3.9 "/Users/rohitchavan/Library/Application Support/JetBrains/PyCharmCE2020.3/scratches/scratch.py"
```

```
Enter the value of n: 10
```

```
The 10 th Fibonacci number is: 55
```

```
Process finished with exit code 0
```
